PRODUCT NAME

Protrac EFP with
Stacking Stand

PRODUCT NUMBER

6235 – 120V 60HZ

AVAILABILITY

IMMEDIATE

*Protrac EFP Shown with Optional Sheet
Storage Cabinet and Roll Box*

GENERAL DESCRIPTION AND MAJOR FEATURES

The Protrac series is designed for moderate to heavy production. The Protrac EFP with Print Stacking Stand is designed for large print runs of only a few different size originals where print stacking is a must. This model Protrac EFP will stack prints up to 34"x44" (A0). It also has an optional 500 sheet modular storage compartment for sizes up to 24"x36" (A1). All Protrac models are equipped with state of the art standard features that include the Diazit TRAC System for virtually odor-free printmaking, dual range speed control for precision sepia/film intermediates, two stage-three pump development control, glass printer cylinder, corrosion resistant developer, and much more. There is an original document tray, not found in most fluorescent lamp machines, which allows for easy handling of multiple originals and is ideal for copying print sets in order. The Protrac models offer instant on/off operation with no warm-up, a solid state speed control for accurate and repeatable operation, and a handy forward/reverse switch. The ammonia supply bottle is equipped with a special cap that allows the ammonia to be changed without opening the ammonia bottle at the machine site (included in Part #6008 Combo Pack).

OPTIONS & ACCESSORIES

24436 Sheet Storage Cabinet, Part #7081
